Abstract (en)

[origin: WO2018167416A1] The present invention concerns a method for preparing zeolite crystals having a multi-modal grain size distribution, and the sizes of which are between 0.02 µm and 20 µm, said method comprising a first introduction of one or more seeding agents into the tubular reactor or upstream of the tubular reactor, and at least a second introduction of one or more identical or different seeding agents into the tubular reactor.
