Abstract (en)

[origin: WO2018109389A1] The invention relates to a device (10) for hanging and/or unhanging a leaf (20), said device being intended to be integrated within said leaf (20). Said device (20) comprises an actuator element (13) and a pusher element (11), said elements (11, 13) respectively comprising a notched section cooperating with a mechanical link converting a rotation movement of the actuator element (13) into a translation movement of the pusher element (11). The invention further relates to a leaf (20) designed to receive such a device (10) and to a method for assembling such a leaf (20).
