Abstract (en)

[origin: WO2018206121A1] The invention relates to a device (10) for producing a standing wave (32) comprising a wave pool (12), at least one obstacle (14), at least one pump (34) and at least one flotation means (26). The obstacle is located in the wave pool. A flow of water may be generated over the obstacle by means of the pump to produce a standing wave in the wave pool, the device being configured as a pontoon by means of the at least one flotation means.
