Abstract (en)

[origin: WO2018166764A1] The invention relates to a filter unit for an extractor hood (1), comprising an ionization unit (22) and a separation unit (21). The filter unit (2) is characterized in that the separation unit (21) is mounted downstream of the ionization unit (22) in the direction of flow, and in that the ionization unit (22) and the separation unit (21) are accommodated in a common housing (20), on at least one wall of which an electric contact element (25, 26) is arranged that is accessible from the outside. Also described in an extractor hood comprising at least one filter unit (2).
