Abstract (en)  
[origin: US2020023528A1] The invention relates to a utility knife comprising a first part (11) and comprising a second part (12) that is mounted so as to be movable relative to the first part (11), and comprising a blade assembly having a blade (16), and comprising an actuator having at least two links (17, 18) that hingedly interconnect the blade assembly and the first part (11) such that a mechanical linkage is formed that is movable by relative movement between the first part (11) and the second part (12), between at least one rear end position and at least one front end position, wherein the second part (12) is indirectly or directly movably connected to one of the links (18) or to the blade assembly in order to move the mechanical linkage.
