Abstract (en)

[origin: EP3597851A1] The present invention relates to a frame for a window delimiting an inner opening, the frame comprising a first frame part and a second frame part, which are interconnected in a corner assembly, each frame part having an inner surface facing the inner opening and an outer surface facing away from the inner opening, and where the corner assembly displays only a single joint line at the inner surfaces of the frame parts. The invention also relates to a method for assembling a corner of a frame for a window.
