Abstract (en)

A pumping unit has a hydraulic circuit (8) which connects together a storage tank (2), a low-pressure pump (7), a high-pressure pump (6) and an internal combustion engine (3) and is provided with a valve unit (13) defined by an electric metering valve (22) and by an overflow valve (23) provided with respective closing members (26, 44) movable between respective closed and open positions in respective directions of movement (A, B) transverse to each other.
