Abstract (en)
[origin: WO2018172083A1] The invention relates to a dishwasher (1), in particular a domestic dishwasher, comprising a washing container (2) for holding goods to be washed and comprising at least one water feed (15) extending completely or partially in the washing container for a water distribution means arranged in the washing container, in particular in the upper half of the washing container (2). Said dishwasher is designed in such a way that at least one lighting device, in particular at least one lighting line (17; 18; 19; 20) along the guiding direction (16) of the water feed, is associated with the water feed (15).
