Abstract (en)

[origin: WO2018175340A1] Disclosed herein are polymer conjugates comprising an active agent linked to a polymer, wherein the active agent comprises an inhibitor, antagonist, or inverse agonist of a mediator of a therapeutic target associated with a condition, including for example, an ophthalmic condition, a dermatological condition, an inflammatory bowel disease or other gastrointestinal conditions and a respiratory condition. The disclosed polymer conjugates reduce exposure of the active agent at non-target sites.
