Abstract (en)

[origin: WO2018175517A1] A vehicle includes a forward frame portion with a seat support portion, a motion control system, and a rear frame portion movably interconnected to the forward frame portion by the motion control system. The motion control system, in response to a forward acceleration of the rear frame portion resulting from a driving force imparted by a wheel supported by the rear frame portion, imparts a force onto the forward frame portion that immediately accelerates the seat support portion in a forward direction.
