Abstract (en)
[origin: WO2018177633A1] The invention relates to a device (10) for transporting and/or storing, in particular plate-form, articles (52), having a substantially horizontally extending bearing portion (12) and having a substantially vertically extending supporting portion (14). The supporting portion (14) comprises a receiving region (28) for receiving a further identical supporting portion (14) of a further device (10), wherein the supporting portion (14) and the receiving region (28) are each configured such that they narrow away from the bearing portion (12) in a vertical direction (22).
