Abstract (en)

[origin: WO2018177925A1] The invention relates to a lamp (100) comprising a first housing (10) in which an operating device is arranged for operating luminous elements, a second housing (20) in which luminous elements are arranged, supply lines extending from the operating device to the luminous elements, and a hinge joint (30) which pivotally connects the second housing (20) to the first housing (10), wherein the hinge joint (30) is sealingly connected to the two respective housings (10, 20) and forms a passage (48) through which the supply lines are installed from the first housing (10) to the second housing (20).
