Abstract (en)

[origin: WO2018177883A1] An electrical component (1) having a winding body (2), a winding (3, 5) of a wire (4, 6) around the winding body (2) and having a connection region (7, 8, 19, 20) is specified, wherein the connection region (7, 8, 19, 20) comprises a wire end (9, 10, 31, 32) of the wire (4, 6) and is configured for latching to a mounting apparatus (17). Furthermore, a component arrangement (23) having the component (1) and a mounting apparatus (17) as well as methods for producing the component arrangement (23) and for producing surface mounting of the component arrangement (23) on a connection apparatus (22) are specified.
