Abstract (en)

[origin: WO2018178003A1] This wideband-reception wired antenna for an underwater craft such as specifically a submarine, equipped with a winch for its deployment, is characterized in that the antenna includes, at its free end, a terminating nipple (41) in which there are arranged means (50) for storing electrical energy for supplying this end of the antenna, and whose operation is controlled by means forming a pressure sensor (51).
