Abstract (en)
[origin: WO2018172377A1] The invention relates to an input device (6) for operating a multimedia device (4) depending on the position of a finger of a user on a pressure plate (24), comprising: - the pressure plate (24) which comprises a lower face (50) and an upper face (48) opposite the lower face (50) and on which the user can move their finger, - a regular grid (15) made of tactile elements (26) which can be haptically sensed by the finger of the user and which are formed on the upper face (48) of the pressure plate (24), and - a sensor (62) which is arranged on the lower face (50) of the pressure plate (24) and is designed to output a button selection signal (42) to the multimedia device (4) depending on the position of the finger on the upper face (48).
