Abstract (en)

[origin: WO2018172213A1] Method for generating and outputting an acoustic multichannel signal, involving the steps of: - supplying a stereo signal (S); - splitting the supplied stereo signal (S) into a plurality of acoustic signal portions (S.1-S.5) that are dependent on the direction of perception; - generating an acoustic multichannel signal by mixing each acoustic signal portion (S.1-S.5) that is dependent on the direction of perception onto an output channel (4.1-4.12) of an acoustic output device (4) comprising a plurality of, in particular more than two, acoustic output channels (4.1-4.12); - outputting the generated multichannel signal via respective acoustic output channels (4.1-4.12) of the acoustic output device (4).
