Abstract (en)
A container (1) for the packaging of disc-shaped elements (d), particularly brake discs for car braking systems, comprising a box-like body (20) made of cardboard and a closure element (80) adapted to be fixed to the box-like body (20); the box-like body (20) comprising a rectangular horizontal base (21) and four vertical side walls (22, 23, 24, 25), which form between them an accommodation cavity (27) which is open upward and has substantially the shape of a parallelepiped. The particularity of the invention resides in that the accommodation cavity (27) accommodates multiple dividers (3, 3', 3'', 4, 32A, 32B, 32C) and supporting elements (5, 7) made of cardboard, interlocked in the accommodation cavity (27) and interlocked with each other detachably, forming between them a plurality of seats (11, 29), each of which is configured to accommodate, protect and keep in position a single disc (d).
