Abstract (en)

[origin: US2020039780A1] The invention relates to a sliver can (1) for accommodating a strand-shaped fiber material (2), comprising a peripheral, at least partially transparent side wall (3), via which an accommodating space (4) for the fiber material (2) is delimited, comprising a can base (5), which is preferably vertically movable within the accommodating space (4), and comprising at least one display element (6) for displaying the quantity and/or at least one property of the fiber material (2) located in the sliver can (1). According to the invention, the display element (6) is arranged in such a way that it is visible through the side wall (3) from outside the accommodating space (4).
