Abstract (en)
[origin: JP2020020083A] To provide a method for operating a textile machine (1) for forming cross-wound bobbins, including an open-end spinning machine. SOLUTION: A textile machine (1) has a plurality of identical workstations (2). During a normal operation of the plurality of workstations (2): yarn is produced or rewound from a supply bobbin onto a receiving bobbin with the workstations (2); and the plurality of workstations (2) is divided into groups (7) of workstations (2) and the groups (7) are started at different times. Moreover, the invention provides a textile machine (1) for forming cross-wound bobbins, including an open-end spinning machine. The textile machine (1) has a plurality of identical workstations for forming yarn or for rewinding yarn from a supply bobbin onto a receiving bobbin, wherein the textile machine (1) comprises a control means or is operatively connected to a control means, which are designed for operating the textile machine (1) according to the preceding description.
