Abstract (en)

[origin: EP3604938A1] An indoor hanging unit (100) for an air conditioner, and an air conditioner having the same are disclosed. The indoor hanging unit (100) includes a body (1), an air deflector (2), a heat exchanger (3), and a fan wheel (4). The body (1) is formed with an air inlet (10a) and an air outlet (10b). The front side of the body (1) is provided with a front panel (11). The top of the front panel (11) is provided with a baffle (10). The baffle (10) is located in front of the air inlet (10a). One end of the baffle (10) is connected with the front panel (11), and the other end of the baffle (10) extends towards the direction away from the air inlet (10a) with respect to the front panel (11). The air deflector (2) is provided at the air outlet (10b). When the air deflector (2) opens the air outlet (10b) upward with respect to the front panel (11), the air flowing out of the air outlet (10b) can flow upward under the action of the air deflector (2).
