Abstract (en)  
[origin: EP3606036A1] Disclosed in the present disclosure are a mobile terminal-based dual camera power supply control method and system, and a mobile terminal. The method comprises: when it is detected that a user operational instruction or other applications start a camera, determining whether the current condition is a specific using condition; if yes, starting supplying power to a camera corresponding to a camera serial number and turning on the camera; and if no, starting supplying power to a camera corresponding to a default camera serial number and turning on the camera.
