Abstract (en)  
[origin: WO2018185311A1] The invention relates to a movement assembly, in particular for a drawer, a sliding door, a hinged door, a flap or a similar movable furniture part, comprising a push-out assembly, the push-out assembly having a guide element (90), on which a stored energy source (80) acts, the guide element (90) being movable by means of the stored energy source (80) from a parking position into an ejection position, and a switching piece (99), which can be moved relative to the guide element (90), being connected to the guide element (90). According to the invention, for improved motion control, the switching piece (99) has a guide element (99.4), which is guided in a guide track (74) of the fitting part.
