Abstract (en)

[origin: WO2018184658A1] The invention relates to a polishing machine (10) and to a method for polishing optical waveguides, comprising a polishing disc (13) having a plug socket (14) for holding a plug with an optical waveguide, a polishing platform (15) for receiving a polishing means, a positioning device (17) for the relative positioning of the polishing disc and the polishing platform between a polishing position and a set-up position (16), and a drive device for carrying out a relative polishing motion of the polishing platform and the polishing fixture in the polishing position. The polishing machine has a cleaning device for applying dry ice to the polishing platform and/or to the polishing disc.
