Abstract (en)  
[origin: EP3385055A1] The present invention is directed to a method for manufacturing a nonwoven plastic composite using recycled thermoplastic material. The method comprises the steps of: i) Providing flakes of lightweight thermoplastic materials to be recycled; ii) Mixing the light weight thermoplastic flakes, thereby forming a thermoplastic matrix having a first melting temperature. iii) Forming a web-structure of a predetermined thickness from fibers having a second melting temperature higher than the first melting temperature using a carding process; iv) spreading the thermoplastic matrix of light weight thermoplastic flakes over the web-structure, v) Optionally forming a second web-structure and placing it over the thermoplastic matrix, vi) Optionally repeating step iv and v, and vii) Consolidating the web-structure(s) by heating the web at a temperature between the first and second temperature using a thermoforming process.
