Abstract (en)

[origin: WO2018185388A1] The invention relates to a vehicle (1) comprising a rear chassis (3) having two side beams (5, 7) that are oriented in the longitudinal direction of the vehicle (1) and between which a central beam (15) is disposed in a parallel manner, said central beam (15) being in the form of a hollow profiled section so as to have a central channel (21) passing through it longitudinally from one side to the other and having a front part and a rear part in the longitudinal direction of the vehicle (1), the vehicle (1) being characterized in that said central beam (15) comprises a reinforcing profiled section (23) nested in its rear part and fixed thereto. The invention also relates to such a central beam (15).
