Abstract (en)
[origin: WO2018185329A1] According to one aspect, the present invention relates to a propulsion system (1000) that is able to move at least one user (2000) around in an underwater environment and is configured to be entirely submerged at least during a phase of propelling the user (2000) in an underwater environment, said propulsion system (1000) comprising at least: • an outer wall; • a drive device (1310); • a propulsion device (1300); the propulsion system (1000) being characterized in that it also comprises: • a breathing supply device (1600); • a buoyancy device.
