Abstract (en)

[origin: WO2018189466A1] The invention relates to a refillable fluid product dispenser comprising: a dispensing head (T) including a fluid product pump (D), such as a pump or a valve, a variable-volume container (R), and a filler valve (7) connected to the container (R), characterised in that it also comprises a variable-volume air pump (30), the volume of which varies inversely with that of the container (R), such as to create a resistance to the variation in the volume of the container (R).
