Abstract (en)  
[origin: WO2018188744A1] The invention relates to a boarding assembly (1) for boarding a vehicle (2), wherein said assembly is arranged outside the vehicle body (4), on a vehicle body outer wall, in a mounted state. The boarding assembly (1) comprises at least one first step (10), which is suspended in the boarding assembly (1) such that it can rotate about a first axis of rotation. The boarding assembly (1) also comprises a pivot device (20) having a second axis of rotation (22) running substantially parallel to the vehicle body outer wall in the mounted state. The pivot device (20) is arranged entirely on the outside of the vehicle body outer wall, in particular within the boarding assembly (1), in the mounted state.
