Abstract (en)
[origin: WO2018172543A1] The invention relates to a trifunctionalised platform of formula (I), to the use thereof as a diagnostic or theragnostic agent and/or a medicament, and to a method for synthesis by the inverse electron demand Diels-Alder reaction from a bifunctionalised tetrazine of formula (II) that itself can be obtained from a monofunctionalised tetrazine of formula (IV). The invention also relates to the monofunctionalised and bifunctionalised tetrazine synthesis intermediates of formulae (IV) and (II) respectively.
