Abstract (en)

[origin: WO2018190701A1] The present invention relates to a method for manufacturing a packaging or holding unit from a recycled paper fraction of domestic waste and such product. The method according to the invention comprises the steps of: - collecting domestic waste; - separating the paper fraction from the collected domestic waste; - dissolving and fiberizing the paper fraction, and producing a pulp material; - cleaning and sorting the pulp material; and - moulding the packaging or holding unit from the pulp material.
