Abstract (en)

[origin: WO2018188742A1] The invention relates to a discharge device (36) for producing a laminar flow, preferably of the impact-type, the discharge device comprising a blade (50) with a cutting edge (54). The blade is associated with a discharge opening (60) of the discharge device, the height (62) of the opening of the discharge device, and in particular that of the discharge opening, being determined on the basis of a distance between a bottom (64) of the discharge device and the cutting edge.
