Abstract (en)

[origin: WO2018189441A1] The invention relates to a fluid tank (1) equipped on its external periphery with at least one branch-off and with a flexible cable or pipe (3), a coupling (2a) of the said at least one branch-off to the tank (1) being situated near the pipe (3) held on the external periphery of the fluid tank (1) by a clip (4), secured to the tank (1) and gripping the pipe (3). A reel (5) surrounds a longitudinal portion of the pipe (3), being partially inserted and held in the clip (4) by clip-fastening means (5a) on the reel (5) collaborating with complementary clip-fastening means (4b) borne by the clip (4), a longitudinal part (5b) of the reel (5) extending externally beyond the clip (4) and being long enough to hold the pipe (3) at a distance of at least 20 mm away from the coupling (2a).
