Abstract (en)  
[origin: KR20180127223A] An air conditioner is disclosed. The air conditioner comprises: a housing having a first inlet port and a second inlet port; a first discharge port arranged in the housing to discharge air entered through the first inlet port; a second discharge port arranged in the housing to discharge air entered through the second inlet port, the air discharged through the second discharge port is mixed with the air discharged through the first discharge port; and a discharge panel having a plurality of discharge holes arranged in a portion of the housing in which the first discharge port is formed, and causing the air discharged from the first discharge port to be discharged more slowly than air discharged from the second discharge port.
