Abstract (en)

[origin: WO2018188940A1] The invention relates to a method for determining data of a traffic scenario (100), the method comprising the steps: - detecting the surroundings of a vehicle (30, 40, 41, 42) by means of a sensor device; - detecting behaviours of road users by means of the sensor device; - combining and valuing the detected data of the surroundings and of the behaviours of the road users; and - storing the combined and valued data.
