Abstract (en)

[origin: EP3611430A1] The present invention relates to a control circuit (18) for a water feeding system (10) of a steam cooking appliance. The control circuit (18) comprises a rectifier circuit (26) and a valve control circuit (28). The valve control circuit (28) is connected to a DC output of the rectifier circuit (26). The valve control circuit (28) is provided for controlling a valve (16) for a water supply. The valve control circuit (28) includes at least one temperature sensor (22) and at least one Zener diode (Z1). The valve control circuit (28) opens and closes the valve (16) in dependence of a temperature detected by the temperature sensor (22).
