Abstract (en)
[origin: WO2018192807A1] The invention relates to an item of furniture (1) comprising a furniture carcass (2) and at least one drawer element (3) retained movably on at least two runners (10), wherein the runners (10) are fixed to a guide track (12) on the furniture carcass (2) and a track (13) on the drawer element (3), and an ejection device (14) is provided on every runner (10), in order to expel the drawer element (3) by means of a force accumulator in the opening direction when the ejection devices (14) are unlocked, wherein between the two ejection devices (14) synchronization means (16, 17, 18) are provided which, when one ejection device (14) is unlocked, also unlock the other ejection device (14), wherein the two ejection devices (14) are fitted offset with respect to one another in the direction of movement of the drawer element (3).
