Abstract (en)

[origin: WO2018192623A1] The invention relates to a donning aid (1) for actuating a slide fastener, comprising a housing (13) having a strip- or rope-type tensioning element that engages at least one receptacle for the slider handle of the slider of a slide fastener and engages at said housing (13), wherein the housing (13) has at least one opening (3) as a receptacle for the slider handle and wherein a support body (4) is arranged in the housing (13) approximately at the level of the opening (3), at which a pressing body (5) that is displaceably guided in the housing (13) is pressed by a pressure spring (21) arranged in the housing (13). According to the invention, at least one actuating element is provided on the outside of the housing (13) in order to compress the pressure spring (21) in the housing (13) of the donning aid (1) and hence to produce a distance between the pressing body (5) and the support body (4) for receiving or releasing the slider handle of a slide fastener.
