Abstract (en)

[origin: WO2018192819A1] The invention relates to a furniture board having an integrated or inserted flap fitting (1), which has lever mechanism (20) having a plurality of levers guiding a flap of a furniture item, wherein the flap fitting (1) has a spring unit which acts on at least one lever of the lever mechanism (20) by means of an adjustable preload. The furniture board is characterized in that the lever mechanism (20) in a closed position of the guided flap moves into a front-side opening of the flap fitting (1) and a front-side opening (4) of the furniture board, wherein the preload of the spring unit (40) and/or the transmission ratio between the spring unit (40) and the lever mechanism (20) is adjustable via an adjusting element having a tool receptacle (423), and wherein the tool receptacle (423) is accessible through a front-side opening in the furniture board and/or the flap fitting (1). The invention further relates to a carcass and to a furniture item which has at least one side wall which is formed by such a furniture board.
