Abstract (en)
[origin: WO2018194509A1] A set of panels for an assembled product is disclosed including a first panel (1a); a second panel (1b); and a third panel (2a). Each of the first panel (1a) and the second panel (1b) comprises a first surface (7a), a second surface (7b), which is substantially parallel with the first surface (7a), an edge groove (4a), and an end surface (4b). The third panel (2a) comprises a first surface (8a) and a second surface (8b), which is substantially parallel with the first surface (8a), and an end surface extending at least partially between the first surface (8a) and the second surface (8b) of the third panel (2a). The end surface of the third panel (2a) comprises a first tongue (9a) and a second tongue (9b). The first panel (1a) and the second panel (1b) are configured to be arranged with their respective end surfaces (4b) facing each other, and with their respective edge grooves (4a) in parallel. The first tongue (9a) of the third panel (2a) is configured to be arranged in the edge groove (4a) of the first panel (1a) to join the first panel (1a) and the third panel (2a), and the second tongue (9b) of the third panel (2a) is configured to be received in the edge groove (4a) of the second panel (1b) to join the second panel (1b) to the third panel (2a), whereby the first panel (1a), the second panel (1b), and the third panel (2a) are joined at least in a first direction.
