Abstract (en)

[origin: WO2018215887A1] A burner (100) comprising a sensor (1) for detecting a flame (2) comprising a sensitive element (3) of the flame (2) comprising a phototransistor or photodiode in use facing the flame (2) to receive an electromagnetic wave emitted by the flame (2) and an interface electric circuit (6) connected between the sensitive element (3) and an output (5) of the circuit configured for converting the detecting signal (4) generated by the sensitive element (3) into a flame signal (2) suitable for being received by a control system (103) of the burner (100).
