Abstract (en)

The invention relates to a tufted artificial turf (100) comprising: an artificial turf carpet comprising a carrier (102), indicator yarn fibers (106) and face yarn fibers (104) and an artificial turf infill (108) distributed between the indicator yarn fibers (106) and the face yarn fibers (104), wherein the face yarn fibers and the indicator yarn fibers being tufted into the carrier such, that the face yarn fibers (104) protrude from the carrier (102) with a face yarn fiber height (L3) and the indicator yarn fibers (106) protrude from the carrier with an indicator yarn height (L2), wherein the face yarn fiber height (L3) being larger than the indicator yarn fiber height (L2), wherein the artificial turf infill (108) has an installation height (L4) above the carrier (102), wherein the installation height (L4) is greater than the indicator yarn fiber height (L2); and wherein the indicator yarn fibers (106) have an first optically visible contrast relative to the face yarn fibers (104) and wherein the indicator yarn fibers (106) have an second optically visible contrast relative to the artificial turf infill (108).
