Abstract (en)

[origin: CN110578943A] The present invention relates to a combined appliance comprising a hob (10) with an integrated fume extraction device (11) having a fume extraction housing (110) and an air duct (12). The combined appliance is characterized in that: an accommodating space (112) in the fume extraction housing (110) for a fan is provided in at least some regions adjacent to the hob (10); an end of the air duct (12) is connected to the fume extraction housing (110); the air duct (12) has a vertical region which runs downwards; and the air duct (12) contains at least one circulating air filter (133). Also described is a kitchen device (3) having a kitchen cabinet (2) and a combined appliance (1).
