Abstract (en)
An indoor unit for an air conditioner includes: a casing (1); a centrifugal fan (30) disposed in the casing (1); a heat exchanger (40) disposed in the casing (1) such that the centrifugal fan (30) is surrounded by the heat exchanger (40) on two or three sides; and a partition (50) with which the centrifugal fan (30) is surrounded in conjunction with the heat exchanger (40), the partition (50) being connected to a first end of the heat exchanger (40) and a second end of the heat exchanger (40) and configured to guide air blown out by the centrifugal fan (30) from the first end of the heat exchanger (40) to the second end of the heat exchanger (40). A distance (L) between the centrifugal fan (30) and the partition (50) at a position near the second end of the heat exchanger (40) is longer than that at a position near the first end of the heat exchanger (40).
