Abstract (en)  
Evaporator and a refrigerator system with evaporator comprising a refrigerant circuit comprising first longitudinal hollow elements (10) with an inner cross section (CS1), and a fluid circuit comprising second longitudinal hollow elements (20) arranged inside respective first longitudinal hollow elements (10), where the second longitudinal hollow elements (20) has an outer cross section (CS2) smaller than the inner cross section (CS1), wherein the difference in the inner cross section (CS1) and the outer cross section (CS2) defines a first cavity (11), arranged to carry a refrigerant.
