Abstract (en)  
[origin: WO2018197892A1] The present invention relates to a laminate (10) comprising a layer of tobacco material (14) and a support sheet (12), wherein the layer of tobacco material (14) has a rough surface so as to provide a permeable structure through which air may be drawn when the laminate (10) is rolled or folded. The present invention also relates to a method of manufacturing a laminate (10), a package comprising a laminate (10), use of a laminate (10) to prepare a smoking article (20), and a smokeable product comprising a laminate (10).
