Abstract (en)

[origin: WO2018197798A1] Head for dispensing a fluid product (T) intended to be mounted on a dispensing member, such as a pump, and comprising a bearing surface (41) for actuating the dispensing member, as well as a spray wall (D) perforated with an array of spray holes (DO) through which the pressurised fluid product passes so as to be sprayed in fine droplets, characterised in that it further comprises a suction chamber (30) having a variable volume such that the volume of the suction chamber (30) decreases when pressure is exerted on the bearing surface (41) and increases when the pressure on the bearing surface (41) is released.
