Abstract (en)
[origin: WO2018197081A1] The invention relates to an electrically driven wheeled device (10), in particular a smart wheel device, comprising at least one main wheel part (12) and at least one drive unit (14), in particular electric motor unit, at least part of which is disposed in the main wheel part (12). According to the invention, the electrically driven wheeled device (10) includes a sensor unit (16) provided for determining a surface roughness of a ground (18) and/or at least one frictional value within the main wheel part (12) and/or the drive unit (14).
