Abstract (en)
[origin: WO2018173081A1] A method for obtaining a reliable system for identifying and authenticating a user person, said method requiring the simultaneous presence of two separate and coupled electronic devices, such as a smartphone or tablet and a passive or active tag or smart device, without the need for the user to insert passwords or pins. The system can be used by Third Parties for providing activities and/or services, such as recharging of a financial instrument, mobile or remotely payments, accesses to private properties or places or things with prior authorization of access and/or identifications for bureaucratic formalities, which need to identify the user.
