Abstract (en)  
[origin: US2018310159A1] Disclosed are systems, methods, and media capable of generating and implementing emergency flows. The emergency flow is highly customizable and can connect with various stakeholders (user, emergency contacts, corporate representatives, emergency service provider personnel, etc.). The systems, methods, and media can be triggered in various ways including user input (e.g. voice command) or by sensors (e.g. by using sound detection capabilities).
