Abstract (en)
[origin: WO2018197607A1] The present invention relates to a device for integrating at least one solar panel (1) into a construction element (2), which device is characterized in that it comprises: - at least one prefabricated construction element (2), - at least one solar panel (1) fitted to said at least one prefabricated construction element (2), - at least one inverter (3) linked to said at least one solar panel (1) by at least two connectors (4).
